

2007 PV Fair

July 7-12, 2007

Conference & Exhibition: Solar 2007

Cleveland, Ohio, USA

Solar 2007 is the annual conference of the American chapter of the International Solar Energy Society (ISES). It will focus on the contribution renewable energy and energy efficiency technologies should take in climate recovery and will include plenary sessions, forums, technical sessions and workshops amongst other things, and is aimed at decision-makers, researchers, inventors, designers, builders, advocates and policy-makers.

July 9-11, 2007

Symposium on Nanotechnology Approaches, Nanomaterials & Thin Films for Energy Technologies

Algarve, Portugal

This symposium will take place during the conference NanoSMat 2007. The main topics will include nanotechnology for efficient energy conversion, photovoltaic materials & technologies as well as thin-film & organic solar cells.

July 27-29, 2007

SolWest Renewable Energy Fair 2007

John Day, Oregon, USA

“Your energy, your food, and your money” is the theme of the ninth annual SolWest Renewable Energy Fair. Admission includes 50 free workshops on both off-grid and grid-intertied renewable energy (RE) and sustainable living topics. Over 50 exhibitors show tools for energy and lifestyle self-reliance, including solar, wind and agricultural resources.

i Eastern Oregon Renewable Energies Non-profit (EORenew)

Jennifer Barker

phone +1/541/575-3633, fax -2525

August 4-11, 2007

Workshop: Solar & Energy Efficient Renovation Strategies for Multi-Family Housing

Solothurn, Switzerland

This workshop will focus on solar architecture, new technologies and design tools for solar and energy efficient solutions. Topics include the renovation for passive solar use, high performance windows as well as heat production and distribution. The event is aimed at architects, engineers, planners, scientists and students in this field. This year there will also be a technical tour visiting building examples.

i ISES International Solar Energy Society

Jennifer McIntosh

phone +49/761/45906-54, fax -99

August 5-8, 2007

17th Workshop on Crystalline Silicon Solar Cells & Modules: Materials and Processes

Vail, Colorado USA

Aimed at professionals working in R&D or commercial production, this workshop will look at expanding technology for a future powered by Si-PV. It wishes to promote scientific exchange in the form of open discussions as well as from invited guest speakers.

i National Renewable Energy Laboratory (NREL)

Bushan Sopori

phone +1/303/384668-3, fax -4

bhushan_sopori@nrel.gov

August 9-10, 2007

Symposium: CAET 2007 - Alternative Energy Symposium

Chicago, Illinois, USA

The focus of this symposium lies in the discussion of the future of alternative energy technologies such as solar cells, wind power and hydrogen generation. Manufacturing processes also will be highlighted and discussion will focus on new developments in the renewables field.

i Center for Alternative Energy Technology

Mike Mimnaugh

phone +1/773/995-3894, fax -2825
